1. BRAND POSITIONING & STRATEGY

TOMY GLOBAL SERVICES is a diversified, premium multi-service company delivering practical excellence across five specialized divisions: Travel, Tech, Interior, Barber, and Care. We serve individuals, families, businesses, and institutions across Africa with reliable, high-quality solutions delivered with warmth and professionalism.

Positioning Statement

For individuals, families, businesses, and institutions across Africa who value quality, reliability, and care in the services that matter most to daily life and operations, TOMY GLOBAL SERVICES is the trusted multi-service partner that brings together five specialized divisions under one premium brand. Unlike single-category providers, we deliver consistent excellence, practical solutions, and genuine human care across travel, technology, interiors, grooming, and personal care.

Brand Story

TOMY GLOBAL SERVICES was founded on the belief that premium service should be accessible, consistent, and deeply human. What began as a vision to elevate essential services across the continent has grown into a diversified group of five focused divisions — each an expert in its field, yet united by shared standards of quality, reliability, and care. From seamless travel and smart technology solutions to beautifully crafted interiors, professional grooming, and compassionate care, TOMY exists to make life better for the people and organizations we serve every day.

Mission

To deliver practical, high-quality solutions across travel, technology, interiors, grooming, and care — making premium service accessible, dependable, and human for individuals, families, businesses, and institutions throughout Africa.

Vision

To become Africa's most trusted multi-service brand, consistently raising the standard of everyday excellence in the services that shape how people live, work, and care for one another.

Brand Essence

Dependable Excellence. Warm Professionalism. African Pride.

Value Proposition

One trusted partner. Five specialized divisions. Practical solutions delivered with premium quality, reliability, and genuine care — across Africa.

Our Five Divisions

- **TOMY Travel** — Premium travel solutions and experiences
- **TOMY Tech** — Smart technology and digital solutions
- **TOMY Interior** — Thoughtful, high-quality interior design and fit-out
- **TOMY Barber** — Professional grooming and personal care services
- **TOMY Care** — Compassionate care and support services

Archetype

The Caregiver + The Creator — nurturing support combined with the ability to build beautiful, functional solutions.

Tone of Voice

Professional yet warm. Competent without arrogance. Clear, helpful, and considered. We speak with quiet confidence and genuine partnership.

2. DESIGN PHILOSOPHY

The visual identity of TOMY GLOBAL SERVICES is built on four immutable principles that govern every expression of the brand, from a favicon to a billboard.

- **Minimalism** — Every element must earn its place. Reduction to essential forms creates clarity and impact. No decoration for decoration's sake.
- **Premium Quality** — The identity must feel handcrafted and intentional, like a bespoke suit or fine timepiece. Materials, finishes, and details matter.
- **Timelessness** — Proportions, typography, and forms are designed to remain relevant for decades. We reject fleeting trends in favor of enduring elegance.
- **Recognizability** — The monogram and wordmark must become instantly ownable signatures. When seen, they should unmistakably say 'TOMY'.

This philosophy ensures the brand feels both established and forward-looking — sophisticated enough for boardrooms in London and Singapore, yet warm enough for genuine human connection.

3. LOGO SYSTEM & PRIMARY MARK

Primary Logo — The Keystone Monogram

The primary logo combines a custom geometric monogram with the wordmark 'TOMY' and descriptor 'GLOBAL SERVICES'. This is the default lockup for most applications.

Primary Logo — Recommended for general use

Symbol Meaning

The geometric 'T' monogram is the keystone of the identity. The strong vertical stem represents foundational strength, leadership, and reliability. The extended horizontal crossbar symbolizes TOMY's global embrace — reaching across borders with precision and openness. Clean geometry and negative space communicate clarity of thought and flawless execution. The gold treatment elevates the mark to premium status.

Alternative Logo Concepts

Three distinct approaches were developed. While the Primary (Keystone Monogram) is recommended for most uses, the alternatives serve specific contexts.

TOMY
GLOBAL SERVICES

Concept 2: Pure Wordmark — Best for formal documents, legal contracts, and high-end print where pure typographic elegance is preferred.

Concept 3: Emblem / Seal — Best for certificates, awards, official seals, lapel pins, and institutional applications requiring gravitas.

4. LOGO CONSTRUCTION, GRID & PROPORTIONS

Grid System

The primary logo is constructed on a modular grid derived from the golden ratio ($\phi \approx 1.618$) to ensure inherent visual harmony. The monogram occupies a perfect square module. The cap height of 'TOMY' exactly matches the height of this square. 'GLOBAL SERVICES' is set at approximately 35% of the 'TOMY' size with tighter tracking for hierarchy.

Clear Space (Exclusion Zone)

A minimum clear space equal to the width of the monogram's vertical stem must be maintained on all sides. No text, graphics, or other elements may intrude into this zone. This ensures the logo always has room to breathe and maintains its premium presence.

Approved Logo Variations

- Full color (Gold monogram + Navy wordmark) — Primary
- Monochrome Navy — For single-color print or dark backgrounds
- Monochrome Gold — For premium applications and dark backgrounds
- Reversed (White/Gold on dark) — Digital and dark applications
- Monogram only — Favicon, app icon, embroidery, seals

Incorrect Usage (Strictly Prohibited)

- Stretching, distorting, or altering proportions
- Adding drop shadows, gradients, bevels, or 3D effects
- Changing the monogram geometry or letter-spacing
- Placing on busy backgrounds without sufficient contrast
- Recreating the logo with different fonts or colors

5. COLOR PALETTE

The color palette is deliberately restrained to project quiet authority and timeless sophistication. Every color has been selected for excellent print and digital reproduction worldwide.

Primary Palette

Primary Dark
#0F172A
CMYK: 100/85/40/40
Pantone: 433 C

Authority, depth, sophistication. Primary text and dominant brand color.

Signature Gold
#C9A962
CMYK: 20/30/70/0
Pantone: 872 C

Excellence, heritage, premium tactility. Monogram and key accents.

Warm Ivory
#F8F4ED
CMYK: 2/3/6/0
Pantone: Warm Gray 1

Backgrounds and premium paper stock. Approachability with luxury tactility.

Supporting Colors

Charcoal #1E293B — Body text and secondary elements.

Pure White #FFFFFF — Contrast, digital interfaces, reversed applications.

Color Usage Rules

- Navy is the dominant color for typography and primary elements.
- Gold is reserved for the monogram, accents, and highlights — never as large background fills.
- Ivory is the preferred background for print; use white or very light gray for digital.
- Always maintain sufficient contrast (minimum 4.5:1 for body text).

6. TYPOGRAPHY SYSTEM

Typography is a cornerstone of the TOMY identity. The pairing of modern geometric sans-serif for impact with refined serif for gravitas creates a distinctive and highly readable system.

Primary Typeface (Logo & Headlines)

Custom Geometric Sans-Serif (inspired by Neue Haas Grotesk / Satoshi)

Characteristics: Clean terminals, consistent stroke weight, generous apertures, refined proportions. Used for 'TOMY' in the logo and all major headlines. Letter-spacing is increased (+0.15em) for a luxurious, breathable feel.

Secondary Typeface (Body & Long-form)

Refined Serif (EB Garamond or equivalent high-quality transitional serif)

Characteristics: Excellent readability at text sizes, elegant contrast, timeless character. Used for body copy in proposals, reports, the company profile, and long-form content. Creates beautiful contrast with the modern logo.

Digital / UI Typeface

Inter (or system sans-serif such as SF Pro / Roboto)

For interfaces, buttons, navigation, and digital products where clarity and accessibility are paramount.

Typographic Hierarchy

- H1 / Display: 28–36pt, Navy, Bold or Semibold, generous tracking
- H2: 16–20pt, Navy or Gold, Semibold
- H3: 12–14pt, Charcoal, Semibold
- Body: 9.5–10.5pt, Charcoal, Regular, 1.35 line height
- Caption / Legal: 7–8pt, Charcoal, Regular

7. ICON FAMILY

The icon family extends the visual language of the monogram into functional UI and communication elements. All icons share a consistent minimalist line weight and geometric aesthetic.

Design Principles for Icons

- Single consistent stroke weight matching the monogram lines
- Geometric forms only — no organic or illustrative styles
- 2–3 colors maximum (Navy, Gold, White)
- Used sparingly and with purpose
- Scalable from 16px to large display sizes without loss of clarity

Example icon categories: Advisory, Connectivity, Insights, Operations, Global Reach, Precision, Partnership. Full icon set available in brand asset library.

8. APPLICATIONS

The following applications demonstrate how the identity system comes to life across touchpoints. Each has been designed with the same rigor and attention to detail.

8.1 Business Cards

Standard size 85 × 55 mm. Premium 400gsm stock with soft-touch or letterpress finish recommended. Double-sided design: front carries primary logo and contact details with generous breathing room; back features subtle repeating micro-pattern of the monogram for instant brand recognition and tactile interest.

Business Card — Front and back with monogram micro-pattern

8.2 Letterhead & Stationery

A4 (210 × 297 mm). Generous 25–30 mm margins. Logo positioned top-left for natural reading flow; contact details aligned top-right for balance. A thin gold hairline rule creates subtle division between header and content area. Minimal footer with small monogram and confidentiality notice. Printed on premium uncoated or lightly textured ivory stock.

Letterhead — Clean, spacious, professional

8.3 Vehicle Branding

Premium fleet vehicles receive minimalist, high-impact branding. Large monogram application on front doors creates a powerful moving billboard. Subtle gold pinstriping adds automotive detailing and premium feel. 'GLOBAL SERVICES' appears discreetly on rear side windows. The overall effect is sophisticated and expensive without being loud.

Executive fleet vehicle with elegant monogram application

8.4 Signage, Environment & Digital Applications

Office Signage: Exterior — large laser-cut or backlit monogram in gold on dark facade or stone. Interior wayfinding uses consistent typography hierarchy with monogram accents. Reception desk features etched or 3D monogram.

Website: Clean, generous whitespace, refined typography. Hero sections use subtle geometric background patterns echoing the monogram construction. Navigation is minimal and elegant. Gold accents on hover and CTAs.

Website homepage visual direction

8.5 Presentations, Documents & Social Media

PowerPoint Template: Master slides with subtle footer monogram. Title slides feature centered logo or large monogram with gold accent. Content slides use thin gold accent bars and consistent icon family. Minimal text per slide is encouraged.

Social Media: Consistent templates with monogram or full logo, powerful short headlines, gold accent lines, and generous padding. All platforms use the same visual language.

Roll-up Banners & Exhibition: Tall vertical formats with large monogram at top, powerful headline, minimal supporting text, and contact/QR at base. Exhibition booths use dark lacquer, gold metal accents, and marble/stone textures for premium tactility.

Roll-up banner for events and conferences

9. PHOTOGRAPHY & ILLUSTRATION STYLE

Photography

Photography is editorial and authentic. Subjects include diverse global professionals in real moments of thoughtful collaboration, analysis, and partnership. Locations reflect TOMY's global presence (Johannesburg, London, Singapore, New York, Dubai, etc.).

Treatment: High-end editorial quality. Controlled natural lighting, shallow depth of field, muted color palette with warm gold highlights. Avoid stock photography clichés. Diversity and inclusion must feel authentic, not forced.

Illustration

Illustration is strictly minimalist line art. Single consistent stroke weight, geometric forms only. Used for process diagrams, subtle chapter openers in the company profile, and extended iconography. Never illustrative or decorative in a heavy sense — always refined and aligned with the monogram aesthetic.

10. MOTION & ANIMATION GUIDELINES

Motion Logo Concept

The monogram assembles with precision: the vertical stem draws first (foundation), followed by the horizontal crossbar extending outward (global reach). A subtle light glint travels along the gold lines. The wordmark fades in elegantly. Total duration: 3–4 seconds. Sound design is restrained — a soft, refined whoosh or subtle chime, never corporate synth or dramatic effects.

Broader Animation Principles

- Micro-interactions: Gold underline on hover extends like the monogram crossbar.
- Page transitions: Subtle fade with a gold accent line sweep.
- Data visualization: Elements build with geometric precision matching the logo construction.
- Restraint is paramount — animation supports the brand; it never overwhelms or distracts.

11. BRAND GUARDIANSHIP & CONTACT

This visual identity system is designed to scale globally while feeling personal and crafted. Consistency across every touchpoint builds recognition, trust, and equity over time.

Usage Rules Summary

- Always use approved master files (vector for print, optimized SVG/PNG for digital).
- Never stretch, recolor, add effects, or alter the monogram geometry.
- Maintain clear space and minimum size requirements.
- For co-branding, establish clear hierarchy with TOMY logo dominant or equal.
- Appoint an internal Brand Guardian responsible for approval of all brand expressions.

Asset Library

Full asset library (logos in all formats, color swatches, typography files, icon set, templates, photography guidelines, and motion assets) is available upon request from the Brand Guardian.
